Introduction

Rastapad Technology Solution Co (RTSC) was established in 1998, building on more than twenty years of invaluable experiences of its managers and experts in Iranian Industries. The main activities of the company, as registered in the Iranian Registration Office for Companies and Industrial Property, are "Engineering, procurement and construction of industrial projects." The company serves the increasing demands of Iranian industries through innovative world-class solutions. We gathered several companies with outstanding technical and financial capabilities in a consortium and recruited highly-efficient field-expert specialists. We're proud of our commendable high-quality role in executing industrial projects.

Mission

We strive to play a critical role in promoting Iranian industries and realizing our country's long-term economic goals by manufacturing the strategic commodity of steel products. Nothing can shake our unwavering determination to achieve those objectives by indigenizing cutting-edge industrial technologies, aided by our world-class engineers and domestic and international technologists.

Vision

As an investment holding company focused on the industrial steel supply chain and related industries, we aim to be a pioneer in providing engineering, manufacturing, and execution services in mining, steel, oil, gas, and petrochemicals in Iran and the region. We also strive to be a major player in domestic and international industrial markets, as well as to lead the glass manufacturing industry according to international standards.

A large industrial plant, possibly a steel mill or refinery, is shown at sunset. The sky is a mix of orange and blue, and smoke or steam is rising from various parts of the facility. The plant features complex piping, structural steel, and tall chimneys.

Services

- Importing industrial plants' technologies(steel making, oil, gas, petrochemicals, cement, etc.).
- Design, supply, manufacture, installation, and commissioning of glass making plants.
- EPC contractor of DRI plants.
- EPC contractor in the field of piping engineering projects in pipelines.
- Design, supply, and manufacture various industrial and construction of Steel Structures.
- Design and manufacturing various customized equipment and machinery for steel making, DRI, Pelletizing and concentrate plants.
- Design, supply, and construction of industrial control and automation systems.
- Supplying all European and Asian equipment required by steel and petrochemical industries.
- Importing and exporting steel industries' raw materials and products.
- Importing mining and road construction heavy machinery and tanker trucks.

EPC Projects

Rastapad can carry out industrial EPC projects in the following industries, from basic design and supply of raw materials to manufacturing equipment, installation, and commissioning, thanks to their technical expertise:

- Steel making and foundry industries.
- Powder metallurgy production lines.
- Mining.
- Engineering, procurement, fabrication, and construction of glass processing lines.
- Oil, gas, and petrochemical plants.

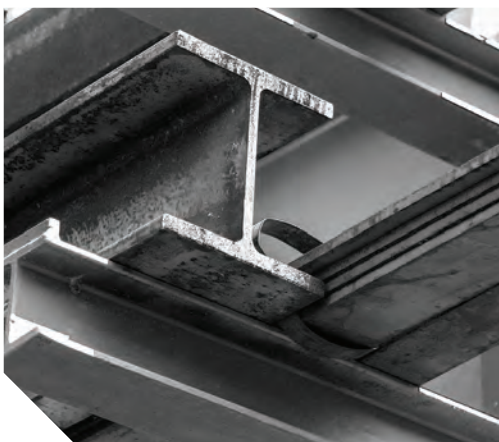

Steel Products Supplier

AhanBama online store: Major supplier of steel products

AhanBama, a RASTAPAD subsidiary supplier of steel products in local and international markets (EU -CIS), is directly connected to domestic brands and main manufacturers and provides the best quality and price in the shortest time to its customers.

Our major products are:

- Light and heavy profiles (IPE, HEA, HEB, HEM, ...).
- Light and heavy UPN (UNP) European standard U channels.
- Equal and unequal angel profiles.
- Ribbed and plain rebars.
- Steel sheet metals (Alloy steel, Stainless Steel, Carbon Steel, Galvanized, ...).
- All types of metal profiles and sections.

International Trade

The vast country of Iran is one of the largest markets in the region for its developing industries and the vastness of its mineral resources, oil and gas, as well as large number of factories.

The sales and marketing team of Rastapad Company, with years of successful experience in creating sales networks in various industries, is ready to obtain sales representatives for reputable manufacturing companies.

This company currently holds the exclusive representation of several European brands in the field of drilling machines, heavy machinery, industrial engines and gearboxes, piping items, etc. which shows the great potency of Iranian market for every creditable company.

The RASTAPAD foreign trade department consists of the following departments:

1. Mining
2. Steel Making
3. Oil, Gas and Petrochemicals
4. Glass Industries
5. Cement
6. Automobile Industries

RASTAPAD also offers the technology transfer from world leading companies in all industrial fields.

Our main partner companies are:

- SIDEWALL (Exclusive representative): Reputable Italian brand for all types of belts and accessories
- LAURINI (Exclusive representative): Major Italian brand for heavy machineries, pipe line machine and mobile cranes
- KTN (Distributor in middle east region): Spanish manufacturer of valves and fittings
- AOKMAN (Exclusive representative): Major Chinese manufacturer of motor and gearbox

We also are a major supplier in the following fields in middle east region:

- Supplier of all rotary equipment from leading European brands (Centrifugal and gear pumps, fan and compressors)
- Supplier of large size compressor and gas turbine from prominent European brands
- Supplier of all types of transformers
- Distributor of all types of industrial and engine oils
- MOTOMECCANICA (Exclusive representative): Reputable Italian manufacturer of world class quality gearboxes from 1957

Import and Export

To facilitate the import and export of machinery, equipment, and raw materials for the mining, steel, petrochemicals, oil, and gas industries, RASTAPAD has established favorable conditions.
